

Some graphs in the gallery require images to reproduce. You will see in the XML file that images are referred to in the following way:

images/**sample.jpg**

Using the example above, to reproduce the graph, you will need to find **sample1.jpg** in the following folder:

http://www.maani.us/xml_charts/images/

Put the downloaded image in the “images” folder in politicalref.com/flash/charts/images. Unless all images the chart needs are downloaded and placed in the folder on your server, the chart will not appear and you will get an error message.
